Such a short game. Got all 5 endings in 40 minutes. Even read everything. Aside from that and the frequent typos, I felt it was a good way to wrap up the series. Also, I guess you don't get any achievements for anything, although there are 4 of them? Oh, well. Overall, I'm pretty satisfied.. Don't expect some cool retro experience. What you get is a game that basically doesn't belong on modern systems, no on Steam, really.. The most bare-bones shmup I've played in my life. Just your pixellated plane on a static background against endless waves of kamikaze planes and the occasional firing "special" one. Then after every 100 points a "boss" battle that leads to a change in the static background.

It is what it is, nothing special, no gimmicks, no astonishing visuals... and it's all the better for it.. 8/10

A very well done game that combines point-and-click, RPG and horror elements.

You wake up in a cabin having no memory of how you got there. Using point-and-click mechanics, you have to find your way out, when the story then starts to progress. Combat is simple enough - get the right timing on attacks to land more damage on each, using potions to recover health when needed, and later on special attacks are available. In town, you can buy new armor, weapons, potions and protective tattoos. Puzzles are simple enough in the sense that you don't really need to look for help online and the game has some pretty scary moments that are actually well done, rather than just throwing random jumpscars at the player.

The story is okay - nothing special, the ending is a bit silly - and the only actual downsides it has is that the Defend command isn't useful at all and the game includes a bit of grinding that isn't really needed and just feels like a cheap way to extend gameplay time (though it isn't really too much of a problem - it's just a bit boring having to hunt/fish for money, but it's at least quick enough that you don't have to do it for hours, usually a few minutes will net you what you need).

Highly recommended, with potential for a sequel, hopefully with a more intriguing story, more horror, more RPG mechanics and more exploration & puzzles.. This game is really fun to play and easy to hide in the background if doing other stuff online. The only thing I don't like is the PvP system, but then I've never really been a fan of PvP in general in games. The background stories behind each mission & events add that little extra detail that makes the game fun & worth playing if the promise of full character customizing didn't already grab you're attention.. Give me a soundtrack. where is it.. It is gost DLC??. Reverse tower defense? What? That's exactly it! In Fat Chicken, instead of warding off a throng of enemies, you want to fatten up livestock and welcome them into your slaughterhouse as bloated and fat as possible! The concept may sound disturbing, but it's so silly and exaggerated that you can't help but chuckle. As a matter of fact it was the sheer level of ridiculous that drew me in! The graphics are pleasant and hilarious (gotta say, my first exploding cow absolutely floored me!) There's a wide variety of challenging and different levels, and you can choose your upgrades as you earn enough stars to buy them. I love being able to re-spec my tower upgrades depending on the level. I love that the 3-star challenge changes from level to level, adding a challenging element and making you think! I've gotten hours and hours of fun out of this game! Good work guys!

Super fun! Markets need a bit of work but the production side of the game is detailed and expansive.. Very fun but meant to be played co op.. So i dedicated some more time into getting to know the game again since its update.

For all backers there is access to the closed beta testing which lets you see the new features and test things out.

I believe the game has some potential and is more than worth its price.

The devs are active and it has its own discord.. This game is a classic. When my wife starts playing this I have to beg her for my computer back. It's fun, challenging, and addicting. Great game to kill time when you don't have enough of it to play a real game.. A fantastic old-school RTS with an innovative research system. At the time of writing this review, there are only 4 campaign missions available, but it's all really great. I can't wait to find out where the story is going. The music and sound effects also blew my mind and to me, these are easily the highlights!. Hard game but I like the challenge. Fast, fun, & highly addictive. Definitely worth picking up.
