I'm an actual firefighter and i have fully determined this game is true crap. Game play and graphics aside, a bit of realism would have been wonderful. The fact that i had to stand in a very specific spot possibly the size of a thumb tack to put the first fire out was ridiculous! This is a truly poor game and I played the newest Duke Nukem.. this game is very good the best firefighter simulator since real firefighter hero even in this early stage of the game it is quite functional but cant wait for the freeplay. So just bought this game. How do I start this, from the crew in the station (NPC's) saying hello 100000 times when you go near the station, then you think you get away from that when you enter a unit to go out on a call and the NPC beside you keeps repeating and repeating what they are saying the whole time. Then I go and mistakenly pick up breathing apparatus in the station, went back and spammed E trying to get it out of my hands again because I wasn't allow back into the unit to go out on a fire, so obviously I then failed my shift and had to restart it all over again. Next thing, at night time you would think the NPC cars on the road would turn on their lights. yes? . well no, because they are all wearing night vision seemly. I paid 14.99 today for this and I've made a ticket to Steam based on the fact that this Simulator/Game shouldn't even be considered in BETA nevermind a proper game. it's Alpha at its best and even at that it's a very very early version. I could go on and on, the physics of the fire engines. I mean doing 120 KMH around corners? one steady engine noise so no sound of acceleration, the water looks like a white smoke. my god I could keep listing, if you happen to read these forums before buying. save the money and spend it on a carton fire game, you will get better details and a less bugged game for the money. It's a disgrace that Steam have this for sale. I'm praying for a miracle and perhaps if it's granted I will get a refund, I mean this really really is a huge disgrace. Stay away from this game, don't make the same mistakes. 3/10 and that's being honest and very generous.. Pro's: -Gives you a chance to explore firefighter tools and duties -Graphics are a 50/50 -Controls are fairly easy Sadly, thats about all I can say for Pros. Con's: -Time to complete mission unrealistic -Physics are terrible -Game posses ALOT of bugs and glitches -Overall little to no realism in firefighting -The game hasn't been updated in a long time -Creators just abandoned the whole thing If you're looking for a good firefighter mod or simulation get GTA IV or GTA V for PC and get firefighter mods for that. Atleast there you will have great graphics, and alot of realism (such as overhauling, and mainting a scene properly). In my opinion game, 1/10.. so laggy and gay. game needs more water, time updates for main story, more graghic updates
