I'm pretty new with Java and JavaFX. When I run my Netbeans project in the JavaFX application form, everything is perfect, it shows my form as expected, but if I run my project in another IDE that has JavaFX or just the project form, it doesn't show my form. Please help me. I'm using Oracle Virtual Box, I downloaded Netbeans from A: I found the solution, I just had to add a launch configuration in Netbeans to point my IDE to where the FXML file is, this because Netbeans is the only IDE that uses FXML as default. In my case I added to the launch configuration in Netbeans: -Djavafx.application.f678ea919e
